Internships

Creative Technologist Intern - Droga5

Summer 2018

Provided Technological guidance, creative concepting, and technical prototyping for clients such as Sprint, Prudential, Chase Bank, YMCA, and The New Museum. Produced prototype micro site for HBO's Game Of Thrones. Worked on experiential installation for Chase's Dallas Innovation Center. Took on responsibilities leading clients through technical creative execution and produced references and designs for various pitches.

Emerging Technologies Intern - GAN Corporation

Summer 2017

Selected to participate in "Moonshot summer internship program." Managed a small group of interns in creating possible future value-add propositions for GAN Corp. Educated GAN software developers in the function and use of the Ethereum development Platform. Interfaced with GAN developers to gather design specifications and requirements. Designed UI/UX for Ethereum mining system. Acted as lead designer for renovation ideas to create and re-purpose a variety of train cars and shipping containers for use as standalone smart up-scale portable office spaces. Designed, engineered, system for mid air drone battery replacement system.

Creative Intern - Amelie Company

Summer 2016

Focused on designing, planning, executing, and delivering a variety of projects and ad campaigns. Was responsible for developing strong and lasting relationships with clients. Created advertising campaigns for Colorado Department of Transportation and other Colorado based companies. Campaigns were based on clients messaging and brand specifications for their targeted demographics. Completely redesigned client facing proposal decks.
